

## Students (m/f/d) for Practical Semester

### WHO WE ARE

KLEVERTEC is a research institute of the Kempten University of Applied Sciences. We extend the shelf life of food by networking technologies and companies of different industries and sizes. We carry out application-oriented research and development in the three process fields of production, filling and packaging and are oriented towards the problems of our industrial customers and clients.

### WHAT YOU CAN EXPECT

- Participation in exciting projects
- Carrying out experiments including evaluation and documentation
- Supporting the team in interdisciplinary tasks
- Expanding your knowledge and skills through practical activities in the research environment
- Individual fields of activity tailored to your strengths and interests

### WHAT WE OFFER

- A young, dynamic team
- Modern working environment with up-to-date technical equipment
- Independent work in an interdisciplinary team
- Flexible working hours

### WHAT MAKES YOU TICK

- Bachelor's degree in mechanical engineering, food and packaging technology, industrial engineering, energy and environmental technology, electrical engineering, computer science or a comparable course of study
- Interest and enjoyment in topics related to food, packaging, electrical engineering design and/or computer science
- High level of initiative and independent working style
- Strong communication skills and open-mindedness
- Experience in working with design programmes (preferably SolidWorks)

Have we aroused your interest? Then send us your application documents to:
